A LITTLE ABOUT ME

I study Computer and Information Engineering at UNPRG. I build software by connecting interfaces, business logic and data: from Angular experiences to .NET services and relational databases. I care about giving every technical decision a clear purpose and delivering software that is useful, maintainable and easy to use.

EXPERIENCE

INCUBA UNPRG · Web developer — Feb. 2026 — Present

Institutional website and landing pages for events, programs and workshops. Python and SQL analysis for reports and visualizations.

Mundoagro Export · Full stack developer — Sep. — Oct. 2026

Custom agricultural ERP built with Angular and Supabase. Modular organization, role-based access with RLS and Cloudflare protection.

ConectArte · Angular developer — Dec. 2025 — Jan. 2026

Commercial SPA for products featuring artistic designs, with a client-side cart, interactive interface and responsive layouts.

Freelance · Junior .NET developer — Aug. — Oct. 2025

Maintenance, reporting and pharmacy modules for a clinical system using C#, WinUI 3 and PostgreSQL.

TECHNOLOGIES

Angular · React · TypeScript · C# · .NET · WinUI 3 · Entity Framework · SQL Server · PostgreSQL · Supabase · Python · ETL · Cloudflare

EDUCATION

Computer and Information Engineering

Universidad Nacional Pedro Ruiz Gallo · 2023 — Present

ADDITIONAL LEARNING

Networking Basics
Cisco · 2026-02

ArchiTech Challenge USS 2025
Universidad Señor de Sipán · 2025-06

Introducción al desarrollo web: HTML y CSS
Google · 2023-06

Microsoft Store Developer
Microsoft · 2025-12

Curso de Informática Forense
HackerMentor · 2025-03

Ciberseguridad en el Teletrabajo
Google · 2023-06
